Gold Mountain Wellness Resort – 5-Page Site: Final SEO Content

Oct 8, 2026 · @Iyyappan

Site structure and developer rules

The site has six URLs: Home plus the five pages in the menu. Content that earlier drafts put on separate pages (spiritual retreat, Karthigai Deepam, individual rooms, journal) now lives inside these pages, so no new routes are needed. This doc replaces the earlier 14-page content draft; use only this one and the new `sitemap.xml`.

Header and footer

Menu stays as it is: **Wellness · Ayurveda · Stay & Rooms · About Us · Contact Us**, button **Book / Enquire** → `/contact-us`, phone as a `tel:+918838198769` link.

Footer fixes (the staging footer has wrong room names and `#` links):

- **Wellness:** Ayurveda Programs → `/ayurveda-treatments-tiruvannamalai` · Yoga and Retreats → `/wellness-resort-tiruvannamalai` · Spiritual Retreat → `/wellness-resort-tiruvannamalai#spiritual-retreat`
- **Stay:** Mountain View Deluxe → `/rooms-in-tiruvannamalai#deluxe` · Mountain View Suite → `/rooms-in-tiruvannamalai#suite` · Mountain View Family Suite → `/rooms-in-tiruvannamalai#family-suite` (replace "Garden Cottages, Hill View Suites, Wellness Villas, Private Sanctums", which are not real room types)
- **Experiences:** Organic Farm and Garden → `/about-us#estate` · Girivalam Path → `/#location` · Nature and Temple Walks → `/#location`
- **Contact:** the exact address from the contact section, WhatsApp, Google Maps link
- Replace the "Sanctuary" wording with "Resort", change © 2024 to © 2026, and either build real Privacy Policy and Terms pages (add them to the sitemap with `noindex` if they are thin) or remove those two `#` links.

Developer must-dos

1. **Metadata per page** in the Next.js App Router, with `metadataBase: new URL('https://goldmountainwellnessresort.com')`, per-page `title`, `description`, `alternates.canonical` (relative path) and `openGraph`. Staging currently serves the same title and description on every page.
2. **Staging stays out of Google:** serve `robots: { index: false, follow: false }` unless `NEXT_PUBLIC_SITE_ENV === 'live'`; set that variable only at launch.
3. **Schema:** paste the JSON-LD from each page section into that page. Resort schema lives on Home; other pages point to it by `@id`.
4. **One H1 per page**, headings in order, all copy in the server-rendered HTML (not injected by client JavaScript).

5. **Prices as real text** in INR by default ("From ₹3,099"); the INR/USD/EUR switcher must not create `?currency=` URLs.
6. **Images:** staging uses Unsplash stock photos for rooms, Ayurveda and about. Replace them with real photos of the resort, WebP, with the alt text given in each page section, `priority` on the hero only.
7. **No placeholders live:** remove every `[PRICE TO BE PROVIDED]` and `[CONTENT TO BE PROVIDED]` string; fill them from this doc or the client.
8. **Keep the Search Console tag** from the live site: `google-site-verification` = `7elKWELRKbhF1q8hvgsLwTvCc_hx93QOJri491Xpz_M`.
9. **Reviews:** staging testimonials (Elena Lindqvist, Claire Vaugrenard, Dr. Rajesh Swaminathan) do not match the live site's real reviews. Use real reviews only; the live site shows 5.0 from 35 reviews.
10. **Claims:** staging uses words like "cure", "remove toxins", "improve immunity". This doc uses softer wording ("supports", "helps relax"); keep it that way.

Discover the story behind Gold Mountain, a resort in Tiruvannamalai built on harmony, traditional wellness and deep respect for the natural world.

H2: Our Story

Gold Mountain was born from a desire to create a sanctuary where people could step away from the noise of modern life. We envisioned a place not just for leisure but for genuine restoration: a space where the natural world and traditional healing practices work together quietly, without pretense.

Our **hospitality** is rooted in genuine care. We step forward when you need guidance and step back when you need solitude.
